

Medical Readiness **NO LONGER** accepts Walk-in's for PHA Part 1's

ALL PHA PART 1's WILL BE SCHEDULED

The new process is as follows:

You as a patient will come to the medical readiness front desk where the front desk staff will book you an appointment for your Part 1 PHA.

The front desk personnel will hand you a patient information sheet to be filled out. Once you as the patient have completed the form you will hand the front desk personnel the patient information form back. In return the front desk personnel will hand you your appointment slip that has your appointment date, time and, the Medic/Corpsman/Medical Technician that you will be booked with. You will also be given a PHA PART 1 CHECKLIST.

Once you as the patient returns for your PHA Part 1 your folder will have been pre-screened and you're entire PHA Part 1 will be completed. Your PHA Part 1 will include: (depending on age and branch) fasting labs, audiogram, visual acuity screening, EKG and, immunization screening. Immediately upon the completion of your PHA Part 1 the Medic/Corpsman/Medical Technician you were scheduled with will book your PHA Part 2 with either your PCM or a Provider currently assigned to Medical Readiness.

We apologize for the inconvenience and appreciate your patience in the process. Please understand that the changes in our screening process are being made in the best interest and for the convenience of you as the patient.

PHA's, Retirement Physicals, School Physicals, Overseas Screenings and Sea Duty Screenings are Wellness appointments. The Current Access to Care Standard is 28 days to be seen for an encounter. Whereas this is the standard we as a Medical Readiness staff are working diligently for this new process to not only maintain the Access to Care Standard but improve the availability of our Readiness services.
